Artsyl Technologies Releases SAP® Business One Connector for docAlpha

Artsyl's docAlpha Smart Process Platform delivers integrated intelligent capture for SAP B1 Customers

ONTARIO, CANADA (Sept 21, 2016) — **Artsyl Technologies, Inc.**™, a leading global provider of data capture and document processing automation technologies today announced it has released a new docAlpha smart process platform connector for SAP Business One. The integration will allow SAP B1 partners and customers to implement a powerful, intelligent capture solution that automates the most painful steps in transactional business processes: data entry and document filing.

Artsyl's docAlpha enables SAP customers to transform their business operations by targeting and eliminating the most costly, inefficient and error-prone steps in typical business processes, including document classification and filing, data entry, routing, approval and ERP transaction creation. As a result, organizations can reduce manual data entry costs, increase data accuracy and improve document processing speed while providing an instant, end-to-end audit trail of document-driven processes and facilitating process compliance and data/document security. With support for extraction and processing of line item data as well as two- or three-way matching of orders, invoices and receipts, docAlpha fully automates supplier invoice, sales and purchase order processing.

"As members of the SAP PartnerEdge® technology partner community, our goal is to elevate the value of SAP as an engine of business process transformation," said Jeff Moore CSO/Partner at Artsyl Technologies, Inc. "The integration of our docAlpha smart process platform with SAP B1 super charges the business impact of SAP, allowing customers to intelligently transform their documents and digital files into actionable information that can drive process automation and achieve higher levels of efficiency and productivity."

Artsyl will attend the ASUG SAP Business One Conference in Miami, Florida September 26-28 and will demonstrate docAlpha's intelligent capture and business process automation capabilities.

docAlpha provides fully automated document classification, data extraction, rules based validation of data, automated splitting and routing of documents to users or queues with email notifications and unmatched export integration capabilities.

Key features of Artsy'sl SAP integration include:

- Instant data transfer from Artsyl to SAP
- Full document and meta-data transfer between systems
- Fast and easy deployment with SAP
- Provides central control over standards, security and auditing

About Artsyl Technologies, Inc.

Artsyl Technologies, Inc. is the innovative company behind the docAlpha Smart Process Platform which fully supports Intelligent Document Recognition (IDR). For over 10 years Artsyl has been designing, building and innovating technology used by companies globally to reduce their document processing burdens. Whether you have Accounts Payable Invoices, Customer Sales Orders, Remittances, Financial Services or Medical documents like Claims, EOBs or Patient Records docAlpha is designed to make their processing easy. docAlpha can be used in any business process to automate the classification, data extraction, validation and routing of mission critical information to its proper line-of-business application. docAlpha is a state-of-the-art platform designed using Microsoft .NET and a Services Oriented Architecture (SOA) which allows it to scale up for Enterprise level On-Premise deployment or be used as a CLOUD based SaaS solution. docAlpha is sold through distributors and VARs globally.
