Artsyl Technologies Joins SAP® PartnerEdge® Program as an SAP Software Solution and Technology Partner

Artsyl to integrate its docAlpha 5.0 Smart Process Platform with SAP Business One

ONTARIO, CANADA (Sept 19, 2016) — **Artsyl Technologies, Inc.**™, a leading global provider of data capture and document processing automation technologies today announced it has joined the SAP® PartnerEdge® program for Application Development. The partnership demonstrates Artsyl's continued commitment to deliver business transformation and technology innovation to maximize customers' investments in ERP systems and business process automation.

The tight integration of Artsyl's docAlpha Smart Process Platform with SAP's Enterprise Resource Planning (ERP) Platform provides a powerful, intelligent capture solution that automates the most painful step in transactional business processes: data entry, document routing, exception handling and filing.

Artsyl's docAlpha enables SAP customers to transform their business operations by targeting and eliminating the most costly, inefficient and error-prone steps in typical accounts payable and receivable processes, including document classification, data entry, routing, exception handling, approval, filing and ERP transaction creation. As a result, organizations can reduce manual data entry costs, increase data accuracy and improve document processing speed while providing an instant, end-to-end audit trail of document-driven processes while facilitating process compliance and data/document security. With support for extraction and processing of line item data as well as two- or three-way matching of orders, invoices and receipts, docAlpha fully automates sales and purchase order processing too.

"We view our partnership with SAP as a powerful force multiplier for our technology vision and sales strategy," said Jeff Moore Partner/CSO at Artsyl Technologies, Inc. "Today, SAP customers who rely on docAlpha to eliminate manual data entry and streamline processes will achieve new levels of productivity and performance and get even more value out of their SAP investment."

docAlpha provides fully automated document classification, data extraction, rules based validation of data, automated splitting and routing of documents to users or queues with email notifications and unmatched export integration capabilities.

Key features of Artsyl's SAP integration include:

- Instant data transfer from Artsyl to SAP
- Full document and meta-data transfer between systems
- Fast and easy deployment with SAP
- Provides central control over standards, security and auditing

About Artsyl Technologies, Inc.

Artsyl Technologies, Inc. is the innovative company behind the docAlpha Smart Process Platform. For over 10 years Artsyl has been designing, building and innovating technology used by companies globally to reduce their document processing burdens. Whether you have Accounts Payable Invoices, Accounts Receivable Remittances, Expense Receipts, Customer Sales Orders, Manufacturing, Financial Services or Medical documents like Claims, EOBs or Patient Records docAlpha is designed to make their processing easy. docAlpha can be used in any business process to automate the classification, data extraction, validation and routing of mission critical information to its proper line-of-business application. docAlpha is a state-of-the-art IDR platform designed using Microsoft .NET and a Services Oriented Architecture (SOA) which allows it to scale up for Enterprise level On-Premise deployment or be used as a CLOUD based SaaS solution. docAlpha is sold through distributors and VARs globally.
