Artsyl Technologies to Demonstrate Transformative Technology for Intelligent Document Capture at RJS HelpSystems ShiftIT User Conference

Artsyl will highlight its new docAlpha 5.0 Smart Process Platform at RJS HelpSystems' 2016 Annual Conference, demonstrating how Webdocs customers and partners can automate document-driven processes

ONTARIO, CANADA (June 13, 2016) — **Artsyl Technologies, Inc.**™, a leading global provider of data capture and document processing automation technologies today announced that it will showcase its docAlpha 5.0 smart process platform at the RJS HelpSystems ShiftIT Conference in Minneapolis, Minnesota June 20-23. The tight integration of Artsyl's docAlpha Advanced Capture Platform with RJS HelpSystems' Webdocs Enterprise Content Management Platform (ECM) provides a powerful, intelligent capture solution that automates the most painful step in transactional business processes: data entry and document filing.

Artsyl's docAlpha enables Web customers to transform their business operations by targeting and eliminating the most costly, inefficient and error-prone steps in typical accounts receivable and accounts payable processes, including document classification and filing, data entry, routing, approval and ERP transaction creation. As a result, organizations can reduce manual data entry costs, increase data accuracy and improve document processing speed while providing an instant, end-to-end audit trail of document-driven processes and facilitating process compliance and data/document security. With support for extraction and processing of line item data as well as two- or three-way matching of orders, invoices and receipts, docAlpha fully automates sales and purchase order processing.

"This year, enhancements to the docAlpha no code smart process platform with version 5.0 represented a new milestone for Artsyl our partners and clients," said Jeff Moore CSO/Partner at Artsyl Technologies, Inc. "Today, WebDocs customers who rely on docAlpha to eliminate manual data entry and streamline processes will get more value out of their ECM investment than ever before."

docAlpha provides fully automated document classification, data extraction, rules based validation of data, automated splitting and routing of documents to users or queues with email notifications and unmatched export integration capabilities.

Key features of Artsyl's WebDocs integration include:

- Instant data transfer from Artsyl to WebDocs
- Full document and meta-data transfer between systems
- Fast and easy deployment with WebDocs
- Provides central control over standards, security and auditing

About Artsyl Technologies, Inc.

Artsyl Technologies, Inc. is the innovative company behind the docAlpha Intelligent Document Recognition (IDR) platform. For over 10 years Artsyl has been designing, building and innovating technology used by companies globally to reduce their document processing burdens. Whether you have Accounts Payable Invoices or Medical documents like Claims, EOBs or Patient Records docAlpha is designed to make their processing easy. docAlpha can be used in any business process to automate the classification, data extraction, validation and routing of mission critical information to its proper line-of-business application. docAlpha is a state-of-the-art IDR platform designed using Microsoft .NET and a Services Oriented Architecture (SOA) which allows it to scale up for Enterprise level On-Premise deployment or be used as a CLOUD based SaaS solution. docAlpha is sold through distributors and VARs globally.
