

Artsyl docAlpha Certification Training

Artsyl Technologies would like to invite you to participate in the upcoming docAlpha 4.5 certification training which is to be held in April 2015 in St. Petersburg, Florida. The event is oriented to Artsyl partners and docAlpha users.

The certification course includes five days of intensive classroom training which will cover docAlpha 4.5 technologies including Batch Capture, Distributed Capture and Semi-Structured Forms Recognition. This deep technical dive will be a huge asset for your professional services and support teams. The knowledge obtained will provide your team with the tools and knowledge to succeed in their daily tasks and challenges.

Light snacks and lunches during the training days are provided by Artsyl Technologies. Please inform us in advance if you have special dietary requirements. It will be our pleasure to accommodate all reasonable requests.

To register for the training please contact:

Artsyl: 905-326-0676 sales@artsyltech.com or (301) 525-5405

docAlpha Training Scope

The training will cover all technical details to master the software. It starts from the power-user level and proceeds to the administrator and solution architect levels. The trainees learn how to use the product efficiently and how to set up and administer jobs and workflows in the Administration Station.

The sessions cover working with users and user groups and setting compliance-friendly automatic user policies, traditional batch splitting as well as document assembly based on batch structure; address flexible batch splitting and routing based on automatic triggers, harnessing the whole power of the hardware running the system by using multi-threading, multi-processing and parallel multi-service approaches; setting up the licensing from simple local networking to distributed networks and centralized control of licenses used by branch office multi-server installations and cloud license deployments.

The trainees learn how to use the Design Station to set up fully automatic data extraction from fixed forms and semi-structured documents. The Designer training starts from Wizard-based quick classification and data extraction jobs, and proceeds to more complex tasks, including context-based searches, regular expression extraction, cascading classification, multi-alternative searches with weighted criteria, relations-based searches and other advanced classification and extraction tools.

The training also includes hands-on use of the Table Wizard to create semi-structured definitions for processing line item details in a point-&-click manner, one of the most powerful new tools introduced in docAlpha version 4.5. The training also covers new features and tools introduced in Service Pack 2 such as working with user groups, company hierarchy and multi-level administration; flexible open SQL query interface for advanced DB lookups and setting up a docAlpha web server for thin client deployments with zero footprint on the user machines and more.

DATE & LOCATION

Location: Hotel Zamora, St. Petersburg, Florida

Date: April 20th - 24th, 2015

Time:

April 20th: 11:00 a.m. - 5 p.m. EST

April 21 - 23: 9:00 a.m. - 5 p.m. EST

April 24th: 9:00 a.m. - 2 p.m. EST

Address: 3701 Gulf Blvd St Pete Beach, FL 33706

DOCALPHA - INTELLIGENT, FLEXIBLE HIGH-VOLUME CAPTURE

docAlpha is a Smart Process Platform capable of fully-automated distributed document capture, classification, data extraction, rules-based validation and application integration.

docAlpha automatically collects, identifies and captures large volumes of structured and semi-structured documents. It provides advanced classification and capture capabilities to extract and verify data and seamlessly integrates with a wide range of ERP, BPM, ECM and database applications.

This robust solution is an excellent fit for the most demanding high-volume, high-complexity business processes.

DOCALPHA KEY BENEFITS

- FULLY AUTOMATED OPERATION;
- SCALABILITY;
- PROCESS ANY DOCUMENT TYPE;
- FLEXIBILITY;
- AUTOMATIC DOCUMENT CLASSIFICATION;
- DISTRIBUTED NETWORK CAPTURE / REMOTE DISTRIBUTED CAPTURE;
- SELF-LEARNING CAPABILITY;
- RECOGNITION INDEPENDENT;
- CENTRALIZED ADMINISTRATION;

docAlpha is typically used to automate business processes which involve manual data entry and validation, as a front-end for ERP, BPM, ECM and line of business systems, to help comply with government regulations, increase accuracy and processing speed and improve customer relations.

docAlpha imports documents from any local or remote source, including scanners, networked MFPs, fax servers or directories. Its front-end integration enables knowledge workers to capture documents from the control panel of popular MFPs and launch a workflow that taps the advanced capture, verification and backend integration features of docAlpha.
