docAlpha

docAlpha is a fully-automated distributed data capture, extraction, classification and processing solution. docAlpha automatically collects, identifies and captures large volumes of structured and semi-structured documents. It provides advanced classification and capture capabilities to extract and verify data and seamlessly integrates with a wide range of document management, content management and database applications.

docAlpha imports documents from any local or remote source, including scanners, networked MFPs, fax servers or directories. Its front-end integration enables knowledge workers to capture documents from the control panel of popular MFPs and launch a workflow that taps the advanced capture, verification and back-end integration features of docAlpha.

SimpleCapture

The SimpleCapture™ solution is the easiest to learn and easiest to use product in its class, yet boasts powerful, high-end features such as database lookups, business rules and even a self-learning intelligent document recognition and extraction module that captures data with a single keystroke. It's unique approach shortens the sales cycle and eases post-sales support.

DATE & LOCATION

Location:

NewWave Technologies Inc
4635 Wedgewood Blvd. Suite 107, Frederick, MD 21703

Date:

January 16 - 18, 2012

- Joint Webinars
- Trade Show Support
- Trials & custom demos for your clients
- and much more

DAY 1:

Part 1: Advanced SimpleCapture Training

- Installation and configuration
- Creating and managing profiles
- Advanced block properties
- Working with Rules
- Database lookups & ODBC exports

Part 2: Introduction to docAlpha

- docAlpha distributed architecture
- docAlpha processing scenarios
- SimpleCapture to docAlpha upgrades
- Licensing and versions
- Server Installation and configuration
- SQL DB level setup and configuration
- Server troubleshooting
- Stations installation and configuration
- Stations troubleshooting
- Server and station update installation
- Running docAlpha in production mode
- Deployment of ready-to-use workflows

DAY 2:

Part 1: docAlpha for Basic Capture Training

- Creation of a workflow from scratch
- Setup and use of docAlpha Auto-Find
- Import connectivity / Auto-Registration
- Export connectivity and customization

Part 2: docAlpha for Fixed Forms Training

- Fixed Forms capture workflows
- Introduction to dA Design Station
- Creating fixed form templates
- Deploying and processing fixed forms

Part 3: Introduction to Semi-Structured Forms

- Semi-Structured capture workflows
- Creating semi-structured templates
- Basic elements and their properties
- Search constraints and relations
- Rapid graphical template development
- Testing and fine-tuning doc definitions
- Deploying & processing semi-str. forms

DAY 3:

Advanced Semi-Structured Capture Training

- Advanced elements & their properties
- Quality, penalties and decision making
- Custom evaluation functions
- Multi-document classification setup
- Grouping and Alternative elements
- Processing typical line item details
- Advanced tables and transactions

Notes:

- Training contains 16 practice sessions
- Training contains 7 written quizzes
- Notebook required for each trainee
- No previous knowledge of docAlpha assumed
