docAlpha

docAlpha is a fully-automated distributed data capture, extraction, classification and processing solution. docAlpha automatically collects, identifies and captures large volumes of structured and semi-structured documents. It provides advanced classification and capture capabilities to extract and verify data and seamlessly integrates with a wide range of document management, content management and database applications.

docAlpha imports documents from any local or remote source, including scanners, networked MFPs, fax servers or directories. Its front-end integration enables knowledge workers to capture documents from the control panel of popular MFPs and launch a workflow that taps the advanced capture, verification and back-end integration features of docAlpha.

SimpleCapture

The SimpleCapture™ solution is the easiest to learn and easiest to use product in its class, yet boasts powerful, high-end features such as database lookups, business rules and even a self-learning intelligent document recognition and extraction module that captures data with a single keystroke. It's unique approach shortens the sales cycle and eases post-sales support.
