Artsyl Technologies releases docAlpha 5.0 IDR data capture solution

New major release of the docAlpha Smart Process Platform powers financial business process automation with expanded workflow automation actions, ERP/ECM integrations and new reporting architecture

ONTARIO, CANADA (March 29, 2016) — **Artsyl Technologies, Inc.**[™], a leading global provider of smart process technology for data capture and document workflow processing, today announced the official release of docAlpha 5.0, the company's flagship smart process platform. docAlpha 5.0 expands on the platform's ability to deliver end-to-end business process automation, beginning with the painful process of intelligently capturing transactional data from scanned paper and digital files. The new docAlpha release features expand how users can leverage captured data to automate functions like approval routing, document matching, exception handling and ERP data entry/transaction processing for improved visibility, compliance, control, efficiency and cash management.

docAlpha 5.0 smart process automation functionality empower users to monitor KPIs, eliminate workflow bottlenecks and reduce process cycle times while providing instant auditability. New platform capabilities allow organization to:

- Automate A/P and A/R processes end-to-end and integrate with the leading on-premise or cloud-based ERP and ECM systems
- Create and share reports and deliver business intelligence that creates greater visibility to processes and key performance indicators
- Refine automated processes to capitalize on key milestones—like early payment discounts or late payment penalties for accounts payable

“docAlpha v5 represents a turning point in delivering cost-effective smart process technology that truly delivers on the promise of end-to-end process automation,” says Jeff Moore CSO/Partner at Artsyl

technologies, Inc. “Organizations that have invested in new ERP and ECM systems to streamline their business and focus on execution will realize ten times their return on their investment when they leverage docAlpha to eliminate the manual steps involved in processing the data and documents that ultimately reside in those business systems.”

docAlpha 5.0 Training Scheduled for April

Artsyl will deliver docAlpha technical certification training to partners and customers April 25-29 in St. Petersburg, Florida. The class consists of five days of intensive classroom style training. docAlpha 5.0 topics to be covered include:

- Multi-tenant deployment
- Expanded workflow actions
- ERP/ECM integrations
- New reporting features

About Artsyl Technologies, Inc.

Artsyl Technologies, Inc. is the innovative company behind the docAlpha Intelligent Document Recognition (IDR) platform. For over 10 years Artsyl has been designing, building and innovating technology used by companies globally to reduce their document processing burdens. Whether you have Accounts Payable Invoices or Medical documents like Claims, EOBs or Patient Records docAlpha is designed to make their processing easy. docAlpha can be used in any business process to automate the classification, data extraction, validation and routing of mission critical information to its proper line-of-business application. docAlpha is a state-of-the-art IDR platform designed using Microsoft .NET and a Services Oriented Architecture (SOA) which allows it to scale up for Enterprise level On-Premise deployment or be used as a CLOUD based SaaS solution. docAlpha is sold through distributors and VARs globally.
