Artsyl Technologies releases Altec Enterprise Content Management System connector for docAlpha IDR data capture solution.

Artsyl will highlight its docAlpha Advanced Capture Platform at Altec's 2016 Evolution Conference, demonstrating how doc-link customers and partners can automate document-driven processes

ONTARIO, CANADA (February 22, 2016) — **Artsyl Technologies, Inc.**™, a leading global provider of data capture and document processing automation technologies today announced the official release of its Altec doc-link Enterprise Content Management (ECM) integration. The tight integration of Artsyl's docAlpha Advanced Capture Platform with Altec's doc-link Enterprise Content Management (ECM) Platform provides a powerful intelligent capture solution that automates the most painful step in transactional business processes: data entry.

Artsyl's docAlpha enables Altec customers to stream-line data and document-driven processes by intelligently auto-classifying and indexing scanned files into their doc-link repositories with metadata. As a result, doc-link customers relying on Artsyl's docAlpha can reduce manual data entry costs, increase data accuracy and improve document processing speed.

"We are truly excited to add doc-link to our portfolio of ECM and ERP integrations and look forward to participating as a sponsor at the Altec Evolution conference to introduce docAlpha to the Altec community of resellers and users," says Jeff Moore CSO/Partner at Artsyl technologies, Inc.

As an Altec Evolution sponsor, Artsyl will present a breakout session on Wednesday, March 2nd at 10:45 a.m. titled "Accounts Payable Invoice Automation – Using Smart Process Technology to Solve Complex Business Problems." Artsyl's docAlpha enables doc-link customers to reduce manual data entry costs, increase data accuracy, improve document processing speed and allows for an end-to-end audit trail of their document-based processes, ensuring compliance and security.

ARTSYL

docAlpha provides fully automated document classification, data extraction, rules based validation of data, automated splitting and routing of documents to users or queues with email notifications and unmatched export integration capabilities.

Key features of Artsy's Altec Document Management System integration include:

- Instant data transfer from docAlpha to doc-link

- Full document and meta-data transfer between systems

- Fast and easy deployment with doc-link

- Provides central control over standards, security and auditing;

About Artsyl Technologies, Inc.

Artsyl Technologies, Inc. is the innovative company behind the docAlpha Intelligent Document Recognition (IDR) platform. For over 10 years Artsyl has been designing, building and innovating technology used by companies globally to reduce their document processing burdens. Whether you have Accounts Payable Invoices or Medical documents like Claims, EOBs or Patient Records docAlpha is designed to make their processing easy. docAlpha can be used in any business process to automate the classification, data extraction, validation and routing of mission critical information to its proper line-of-business application. docAlpha is a state-of-the-art IDR platform designed using Microsoft .NET and a Services Oriented Architecture (SOA) which allows it to scale up for Enterprise level On-Premise deployment or be used as a CLOUD based SaaS solution. docAlpha is sold through distributors and VARs globally.
