Artsyl Technologies joins Oracle® PartnerNetwork® Program as an Oracle Software Solution and Technology Partner

Artsyl's to integrate its docAlpha 5.0 Smart Process Platform with Oracle

ONTARIO, CANADA (Oct 19, 2016) — **Artsyl Technologies, Inc.**™, a leading global provider of data capture and document processing automation technologies today announced it has joined the Oracle® PartnerNetwork® program for Application Development. The partnership demonstrates Artsyl's continued commitment to deliver business transformation and technology innovation to maximize customers' investments in ERP systems and business process automation.

The tight integration of Artsyl's docAlpha Advanced Capture Platform with Oracle's Enterprise Resource Planning (ERP) Platform provides a powerful, intelligent capture solution that automates the most painful step in transactional business processes: data entry and document filing.

Artsyl's docAlpha enables Oracle customers to transform their business operations by targeting and eliminating the most costly, inefficient and error-prone steps in typical accounts receivable and accounts payable processes, including document classification and filing, data entry, routing, approval and ERP transaction creation. As a result, organizations can reduce manual data entry costs, increase data accuracy and improve document processing speed while providing an instant, end-to-end audit trail of document-driven processes and facilitating process compliance and data/document security. With support for extraction and processing of line item data as well as two- or three-way matching of orders, invoices and receipts, docAlpha fully automates sales and purchase order processing.

"Artsyl Technologies is proud to be part of the Oracle PartnerNetwork," said Jeff Moore CSO/Partner at Artsyl Technologies, Inc. "Oracle is a leader in managing and driving enterprise-wide intelligence and Artsyl's docAlpha Smart Process Platform allows customers to intelligently transform their documents

and digital files into actionable information that can fuel their automated business processes and achieve higher levels of efficiency and productivity."

docAlpha provides fully automated document classification, data extraction, rules based validation of data, automated splitting and routing of documents to users or queues with email notifications and unmatched export integration capabilities.

Key features of Artsy'sl Oracle integration include:

- Instant data transfer from Artsyl to Oracle
- Full document and meta-data transfer between systems
- Fast and easy deployment with Oracle
- Provides central control over standards, security and auditing

About Artsyl Technologies, Inc.

Artsyl Technologies, Inc. is the innovative company behind the docAlpha Intelligent Document Recognition (IDR) platform. For over 10 years Artsyl has been designing, building and innovating technology used by companies globally to reduce their document processing burdens. Whether you have Accounts Payable Invoices or Medical documents like Claims, EOBs or Patient Records docAlpha is designed to make their processing easy. docAlpha can be used in any business process to automate the classification, data extraction, validation and routing of mission critical information to its proper line-of-business application. docAlpha is a state-of-the-art IDR platform designed using Microsoft .NET and a Services Oriented Architecture (SOA) which allows it to scale up for Enterprise level On-Premise deployment or be used as a CLOUD based SaaS solution. docAlpha is sold through distributors and VARs globally.
